

The bridge to possible

Be more able to reduce energy consumption of your servers.  
Be more sustainable with Cisco.

“ We can help reduce your DC compute energy consumption this winter, easing the burden on your country’s power grid ”

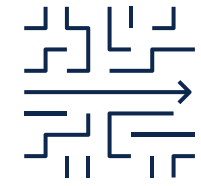

### Observation

Continuously monitors all VM resource utilization on any server platform

Track long-term historical VM resource utilization

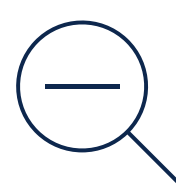

Simple Software Delivery

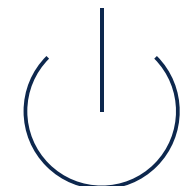

### Action

Make Hardware usage more efficient

Reduce CPU or Memory allocated to a VM

See which hosts to turn off.
