Plug-n-Play
Topology

Software Image Management (SWIM)
Network Inventory/Discovery
Command Runner
Template Programmer
eNFV Provisioning

IT and network system processes

IT Service Management (ITSM)
IP Address Management (IPAM)
Reporting
Analytics

Cross-domain integration

Cisco Meraki | Networking
Cisco Stealthwatch | Security
Cisco ACI | Data Center

SDK for adding third-party devices

Manage multivendor environments, by creating DNA Center support for non-Cisco devices so that it can not only discover and inventory them, but also figure out the topology, their availability and health score.

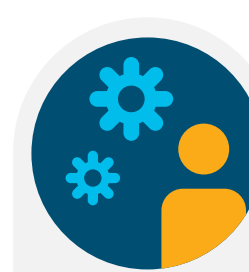

Power of Cisco DevNet

Network engineers

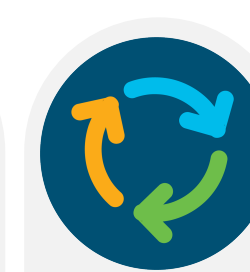

Application developers

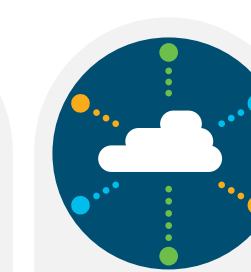

Service providers

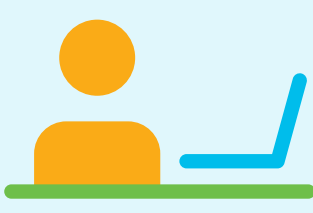

Consulting services

Network DevOps

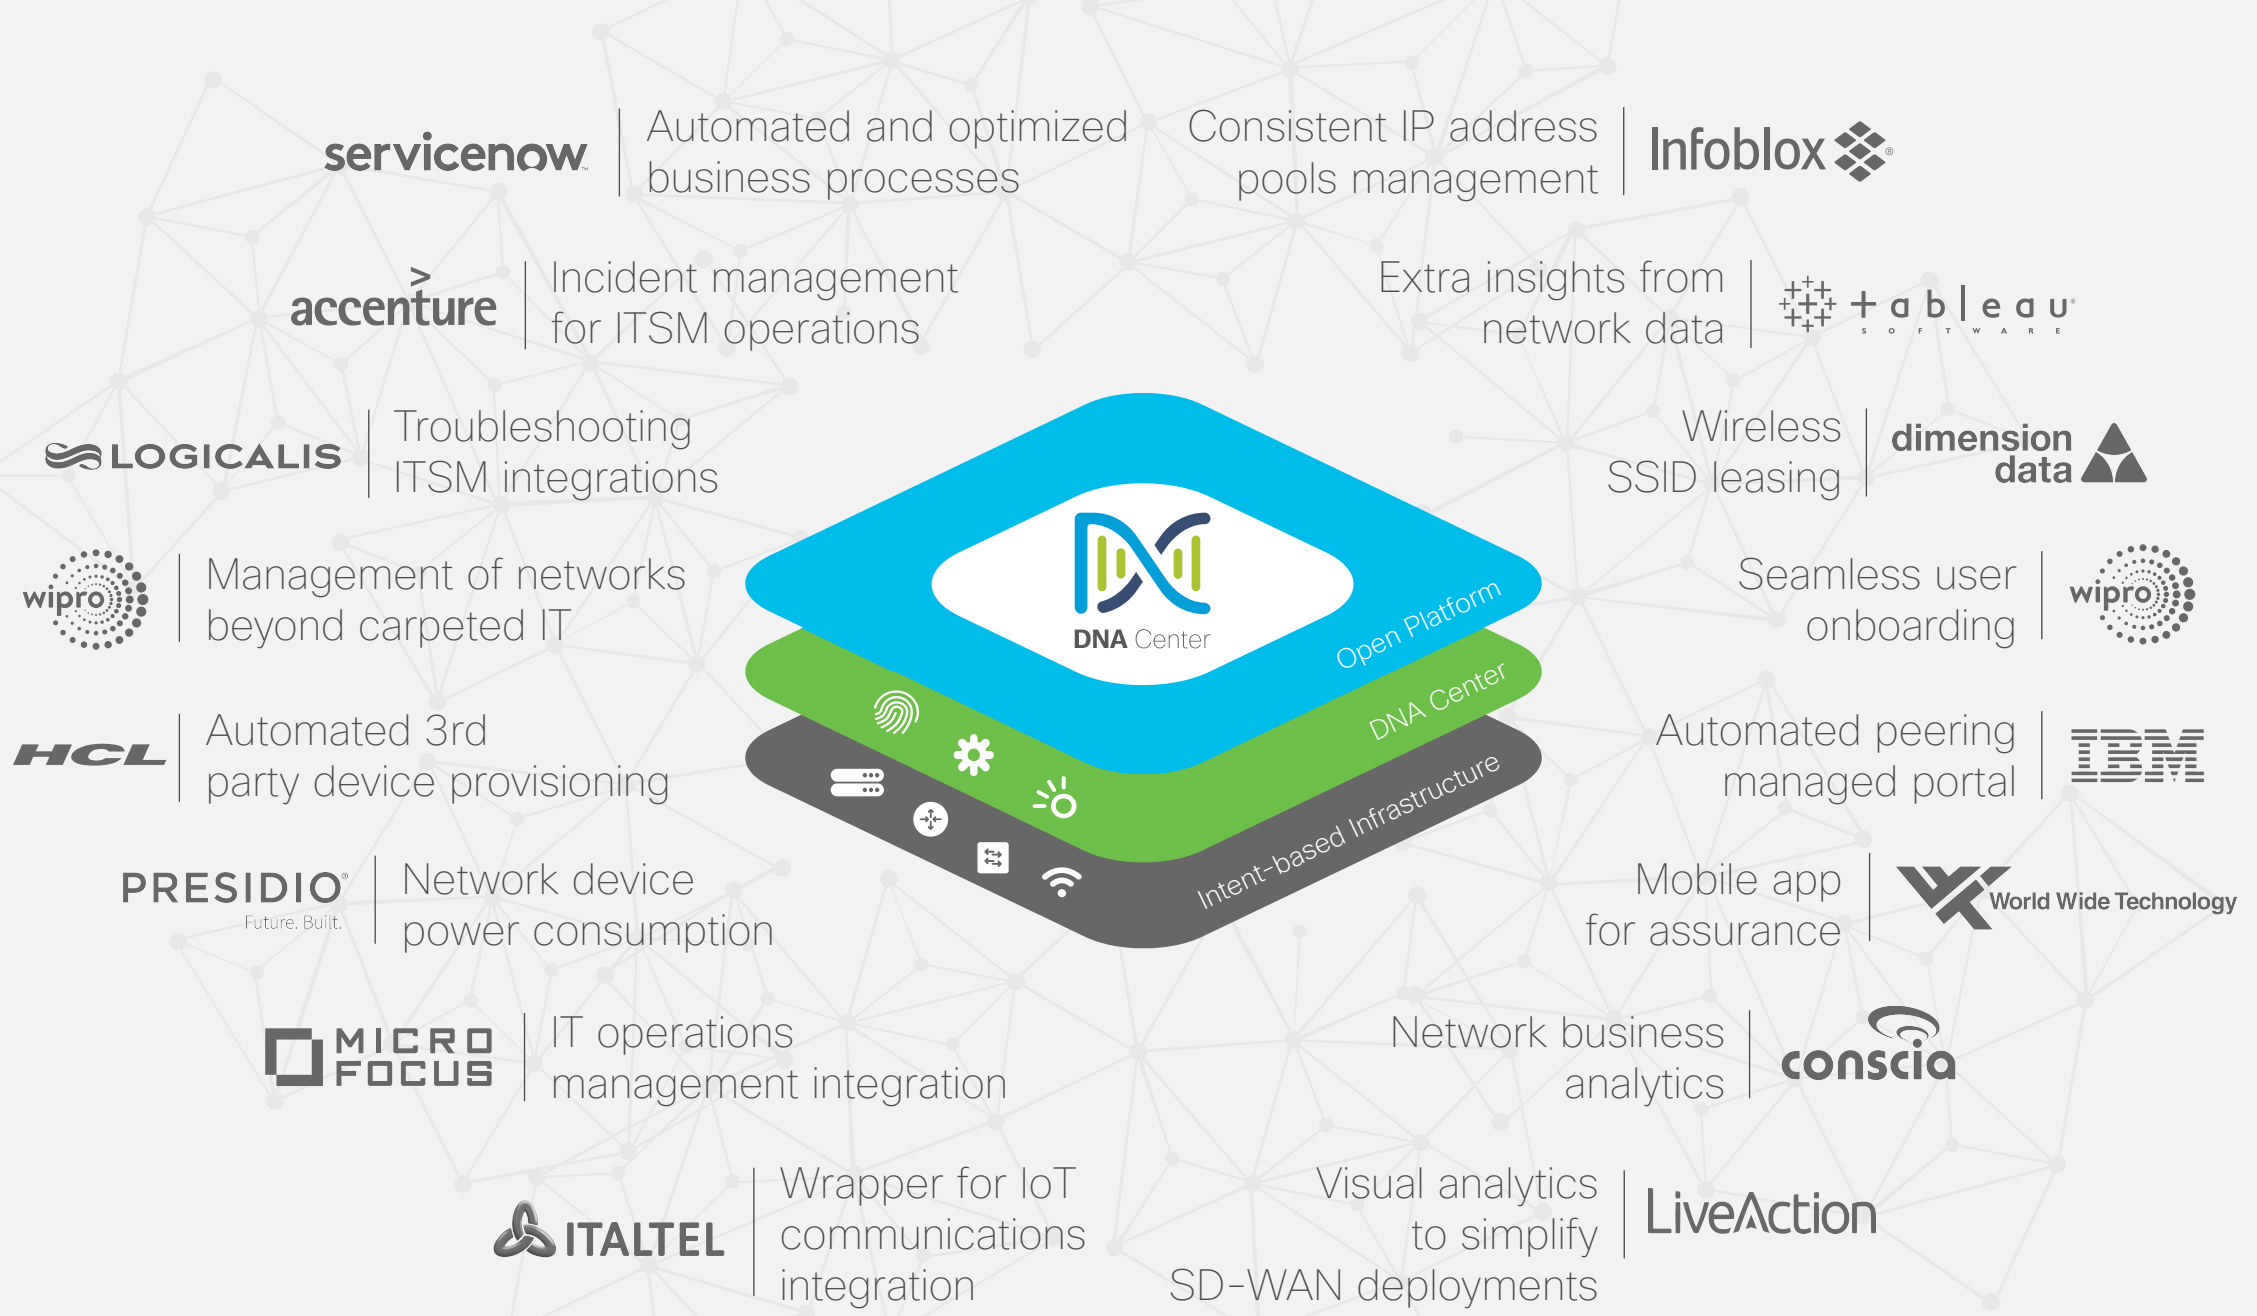

System integrators

Now with over 500,000 developers

Learn how to use DNA Center APIs.
Develop, debug, and test in a DNA Center sandbox.
